-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 17 and 18 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 6. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
2. Claims 3-4, 7-12 and 15-16 are objected to due to the phrase 'consist of at least one'. The word 'consist' is a closed term, while the term 'at least' constitutes an open term. Examiner is unclear of the scope of the claim. Is there only one swiveling locking element?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, and 5-6, 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Sreter (U.S. 5,180,352). Referring to claim 1, Sreter discloses a dumbbell with a handle element (9) and with at least one holder (3) for removable fastening of one or more weight disks, wherein the at least one holder comprises a casing, the interior of which is open on a front side facing away from the dumbbell

Art Unit: 3764

handle element for insertion and removal of the weight disks, and locking means (8) capable of acting in combination with weight disks on their outer circumference.

Examiner also respectfully points out that Applicant has failed to positively claim the weight disks, and therefore, they are not considered part of the invention. Referring to claim 6, as best understood, the locking means of Sreter may act radially on weight disks.

5. Referring to claim 2, Sreta teaches a dumbbell handle element with at least one holder for removable fastening of one or more weight disks, and electronic circuitry provided on the holder (electronic oscillator).

6. Referring to claim 5, Sreta discloses the claimed invention including the electronic oscillator which creates sound which may construe an anti-theft device.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sreta. Sreta teaches the claimed invention, as best understood, but fails to teach specific limitations regarding materials. The specific materials chosen would have been a matter of obvious choice to one of ordinary skill in the art at the time of invention.
